

FSC® ENVIRONMENTAL POLICY

The ROSA ANNA E ROSA LUIGIA farm firmly believes that the safeguard of the environment is a value to be constantly pursued and is also aware of the increasing attention paid by the community to environmental issues and sustainable development. **Through the environmental policy explained in this document, it wants to state its commitment to the environment and define a path for the implementation and improvement of its plantation management system.**

Therefore, the ROSA ANNA E ROSA LUIGIA farm is aware of the fact that its activities, products or services may interfere with the natural ecological balance, and includes the protection of the environment among its strategic goals to be taken into account upon the performance of all the activities carried out directly or through its suppliers on its site.

The main commitments of the ROSA ANNA E ROSA LUIGIA farm in this area are the protection of the environment, the compliance and constant compliance with the legislative requirements and rules applicable to the management of poplar groves, as well as the long-term preservation of the plantation area. For this purpose, the company has duly established and applied a Forest Management System that complies with the FSC® principles and criteria (FSC-C018126.)

To achieve these objectives, the company intends to act as follows:

1. Enforcing forest management systems capable of minimizing any negative impact on the environment, promoting the preservation of natural resources;
2. Reducing the production of waste and optimizing its management;
3. Strengthening the responsibility of employees and cooperators towards the protection of the environment, spreading information and offering training programs to the personnel;
4. Optimizing the benefits deriving from the proper management of the plantation;
5. Improving the social and economic well-being of workers.
6. Defining improvement programs for the gradual replacement of artificial fertilizers with organic ones or products approved for organic farming
7. Promoting gender equality in employment practices as well as equal training opportunities, award of contracts, involvement processes and management activities.
8. In particular, the Organization undertakes not to offer or receive any bribes in cash or any other form of bribery and to comply with anti-bribery legislation.
